

NEODUR HE 3

mineral dry mortar for cementitious industrial floors in dry-shake method to improve surface hardness and increase wear resistance

DESCRIPTION	NEODUR HE 3 is a ready to use cementitious dry mortar for the production of industrial floors in dry-shake method acc. to DIN EN 13813 on the basis of KORODUR hard aggregates acc. to DIN 1100 (groups A and KS) in the qualities		
	 NEODUR HE 3: on the basis of KOR NEODUR HE 3 SVS 3: on the basis of KOR NEODUR HE 3 SVS 1,5: on the basis of KOR Also available in colour, see KORODUR colour cha 	ODUR WH-Special ODUR Diamond Concrete	
APPLICATION	For the production of heavy-duty industrial floors, e.g. car parks, industrial halls, assembly halls, aircraft hangars, workshops, high-bay warehouses and other industrial areas subjected to most severe stress. Indoors and outdoors.		
SUSTAINABLE Construction	The use of NEODUR HE 3 increases the energy and resource efficiency and conserves natural resources. A hard aggregate industrial floor has an outstanding durability. The service life of a hard aggregate industrial floor is many times longer than that of a pure concrete floor or alternative industrial flooring systems. For further information contact KORODUR.		
PROPERTIES	 wear resistant also under heaviest stress forklift resistant water-resistant, suitable in wet areas anti-skid, non-slip electrostatically non-chargeable chloride-free physiological and ecological harmless consistent quality ensured by quality assurar 	nce acc. to DIN EN 13813	
TECHNICAL DATA	Quality	NEODUR HE 3 NEODUR HE 3 SVS 3 NEODUR HE 3 SVS 1,5	CT-C70-F9-A6 CT-C70-F9-A3 CT-C70-F9-A1,5
	Granulometry	all qualities	0 - 3 mm
	Colour	all qualities	cement grey
	Wear resistance abrasive wear acc. to Böhme acc. to DIN EN 13892-3	NEODUR HE 3 NEODUR HE 3 SVS 3 NEODUR HE 3 SVS 1,5	≤ 5,0 cm ³ /50 cm ² ≤ 3,0 cm ³ /50 cm ² ≤ 1,5 cm ³ /50 cm ²
	Compressive strength [N/mm ²] after 28 days, measured on defined prisms acc. to DIN EN 13892-2	all qualities	C70
	Flexural strength [N/mm ²] after 28 days, measured on defined prisms acc. to DIN EN 13892-2	all qualities	F9
	Temperature processing, ambient and sub-base temperature	all qualities	≥ 5 °C
	Material consumption per m ²	all qualities	cement grey approx. 3 - 5 kg coloured approx. 5 - 6 kg
PROCESSING	Sub-base The base concrete must be produced at least as g air-entrained concrete!). The surface must be prov For intermediate curing of the base concrete we r	duced in level within the tol	erance limit acc. to DIN 18202

The fresh, just walkable base concrete is trowelled with disk float.

NEODUR HE 3

	Processing Apply NEODUR HE 3 dry and uniformly (e.g. by means of spreader). After moisture penetration of the applied NEODUR HE 3, treat the surface with disk float. A further analogous application can be carried out as long as the dry mortar still moistens, followed by timely grinding with disk float to close pores and, depending on the requested surface texture, smoothing (helicopter).
	On steel fiber concrete base, NEODUR HE 3 can be mechanically applied directly in the freshly installed base concrete using a spreader. Next working steps on compaction and smoothing as afore described.
AFTER-TREATMENT	Differing temperatures may influence the setting and hardening process. NEODUR HE 3 must be protected from too rapid drying out acc. to DIN EN 13670 / DIN 1045-3. For after-treatment of the NEODUR dry-shake layer we recommend the use of our products KOROMINERAL CURE or KOROTEX (see data sheets). In case a subsequent surface modification, coating or marking is specified, the after-treatment should be carried out with foil.
JOINTS	The joint grid must be specified by the planner.
SUPPLY	25 kg special paper packaging (NEODUR HE 3) 30 kg special paper packaging (NEODUR HE 3 SVS 3 and NEODUR HE 3 SVS 1,5) big bag
STORAGE	Dry, like cement. Shelf-life approx. 12 months.

HINTS This product contains cement and has an alkaline reaction with moisture/water. Therefore protect skin and eyes. In case of contact with eyes, consult a doctor. The specifications provided in this data sheet for application and processing are based on tests carried out by KORODUR under ideal conditions in the laboratory and acc. to the relevant technical regulations. Therefore, the indicated data don't represent directions for application or a quality agreement in the meaning of § 434 (1) BGB, no regulation in the meaning of § 434 (2) sentence 2 BGB (German Civil Code) and no guarantee for practical application. Due to the differing conditions on site, preliminary own tests and suitability checks are required before application. Please consider the currently valid product information as well as the relevant safety data sheet acc. to Regulation (EC) No. 1907/2006 in the latest version – also published on the internet: www.korodur.de.
